

Meredith Monaco

Founder - Girl Lab! and Manufacturing Program Manager – Raytheon

Meredith Monaco is the founder of Girl Lab! a STEM club for middle school girls based at the Boys and Girls Club. She spends her days as a Manufacturing Program Manager for Raytheon Integrated Defense systems where she focuses on Above Water Sensors programs. Monaco has been volunteering with the Boys & Girls Club of Lawrence for several years. Following graduate school, she funneled her passion of getting young girls excited about engineering and created Girl Lab! a club for middle school girls that explores the fun and feminine sides of STEM subjects weekly. Her goal is to continue to expand Girl Lab! across more clubs around the country. Originally from Albany, NY, Monaco moved to Boston to attend Northeastern University where she received her Bachelors in Mechanical Engineering in 2001. She has since pursued a career in manufacturing operations and in 2014 received her Master's in Business Administration from Northeastern University, with a focus in International Business.
