

Janice Barney

A graduate of the University of Massachusetts (Dartmouth) and Bridgewater State College, Janice started her career in science as an ASCP (American Society for Clinical Pathology) registered microbiologist at Morton Hospital in Taunton Massachusetts, and later as a lab supervisor at International Clinical Labs. She was the recipient of a graduate research fellowship at UMass Medical School.

Janice has taught science at the high school and college level, and has been Dean of STEM subjects at Mount Wachusett Community College since 2009. Janice worked closely with the architectural and design contractors regarding the layout of the laboratory space located in Mount Wachusett's new 44,000 square foot science wing, which opened fall 2016. In spring 2017, Janice served on Commissioner Santiago's statewide STEM task force concerning four-year transfer pathways. Dean Barney has served as a panelist and as a presenter on various STEM boards both state and college-wide.
